

REPORT LAB1

-comparison in reliability ,connection and data integrity

Feature:	TCP or UDP	Reason?
reliability	TCP	Resends lost packets and confirms delivery
Connection Establishment	TCP	Uses 3-way handshake before sending data
Data Integrity ordering	TCP	Ensures data arrives in correct order

-use case and performance

Feature:	TCP	UDP
Use Cases	Web browsing, email, file transfer	Live streaming, VoIP, online gaming
Performance	Slower due to acknowledgments	Faster because no acknowledgments
